EDUCATION

Qarshi University

Bachelor of Computer Science (BS.CS)

Lahore, Pakistan

2022-2026

PROJECTS

Blood Donation Management System

- Developed a complete desktop-based system to manage donors, recipients, blood groups, and donation records.
- Added validation, searching, and filtering features to improve workflow efficiency.
- GitHub: github.com/rizwanahmed6/BloodDonation

Library Management System (GUI Based)

- Built a fully functional library system supporting book registration, issue/return operations, and user management.
- Followed OOP design principles to implement modular classes and reusable components.
- Created a clean and intuitive graphical interface using Java Swing.
- GitHub: github.com/rizwanahmed6/LibraryGUI

Travel & Tourism Website (DB + PHP + XAMPP)

- Developed a dynamic tourism website offering destination info, package details, and user login/signup features.
- Connected PHP frontend with MySQL database for authentication and travel package data retrieval.
- Ensured responsive UI and cross-browser compatibility through iterative testing.
- GitHub: github.com/rizwanahmed6/DB-travel-project

Medlify – AI-powered Bike Maintenance App

- Developed a mobile application designed to detect and resolve motorcycle issues using **AI-powered diagnostics**.
- Implemented **Riverpod** for efficient state management and clean app architecture.
- Designed user-friendly screens allowing bike owners to report issues, receive AI-generated suggestions, and manage maintenance history.
- GitHub: github.com/fatinna/mendlify

TECHNICAL SKILLS
